Always try to use 2 pointers in strings.

String match algo:

Brute: O(n.m)
KMP:O(n+m)
Rabin Karp Worst → O(m*n),Average & Best → O(m+n)

For code see gfg solution

For rabin karp see tech dose video.For KMP see chirag jain video.

```cpp
s.append(to_string(curNode->val)+',');
stringstream s(data);
string str;
getline(s, str, ','); //stores str from s till , is not reached;
```
